

VESA Bracket

Part.No: 6736

For KVM Extender Series SVX / MVX

This robust **VESA bracket** is used to attach an SVX1 or MVX1(-F) extender to a VESA mounting compliant monitor. The extender and monitor are effectively merged together, saving space and preventing a tangle of cables.

Due to the clever construction, the entire system can be mounted on a regular VESA stand using the same mounting holes.

TECHNICAL SPECIFICATION

Dimension: 197 x 9,5 x 104mm
Material: 1mm aluminium
VESA: 75x75mm, 100x100mm
