

# PE Video Line Pro

Part Nr: 8001

## Video Converter

**On Screen Menu**  
**Mouse operation**  
**Light pen / mouse option**  
**Perfect picture on LCD Monitor**  
**Flicker free**  
**Razor sharp**  
**Colour Hardcopy**  
**Low power consumption**  
**Maintenance free**  
**All-purpose, highly versatile**

- Suitable as a substitute for 15kHz industrial monitors via a converter with a modern LCD monitor
- The PE line video converter was specially developed for industrial and power plant applications and has proven its value in thousands of installations.
- The converter digitizes the input signal in RGB mode; caches the complete image and displays it in a video source independent format. In contrast to converters with single line cache, this method provides greater flexibility and can be used in a wide variety of situations.
- Even non-standard resolutions are perfectly mapped on LCD monitors
- Preset timings for ABB Mod 300, Altim ALCONT1 and ALCONT2, FOXBORO, HARTMANN & BRAUN Contronic P, Honeywell TDC3000, Measurex, SIEMENS Teleperm M, YOKOGAWA Alspa ZS Micro Z and many more

**digitale Technik**  
brilliante Bildübertragung  
flimmerfrei bei LCD
